

Pallet Cage

Pallet cages are designed to cater for items that are difficult to store and transport safely on pallets alone. The pallet cage is versatile and is in use across a wide range of industries, with the horticultural and automotive industries being primary users of this product.

Features

- Cage sections attach to standard pallet hire
- Complete cage units each consisting of a base cage section and a pallet can be stacked 5 high
- Cage sections are modular with a maximum assembled height of four modules
- Cage sections are demountable
- Construction from galvanised steel

Benefits

- Compatibility with supply chain infrastructure
- The ability to stack cage units provides storage efficiencies for customers
- Modularity provides versatility and flexibility in terms of how customers can most efficiently utilise this product
- Unlike alternative 'fixed-sided' products, cages can be efficiently transported in their demounted state
- Robust construction ensures product durability and reliability whilst in use by customers
